

ENERGIA EÒLICA GENERADOR KIT C-0209

Manera divertida d'aprendre a convertir l'energia eòlica en una forma d'energia útil, així com l'ús de turbines de vent per encendre els llums LED i moure els pedals del ciclista. Com més fort sigui el vent, més ràpides seran les pedalades del ciclista ECO i més gran serà la lluminositat del LED.

Eines necessàries

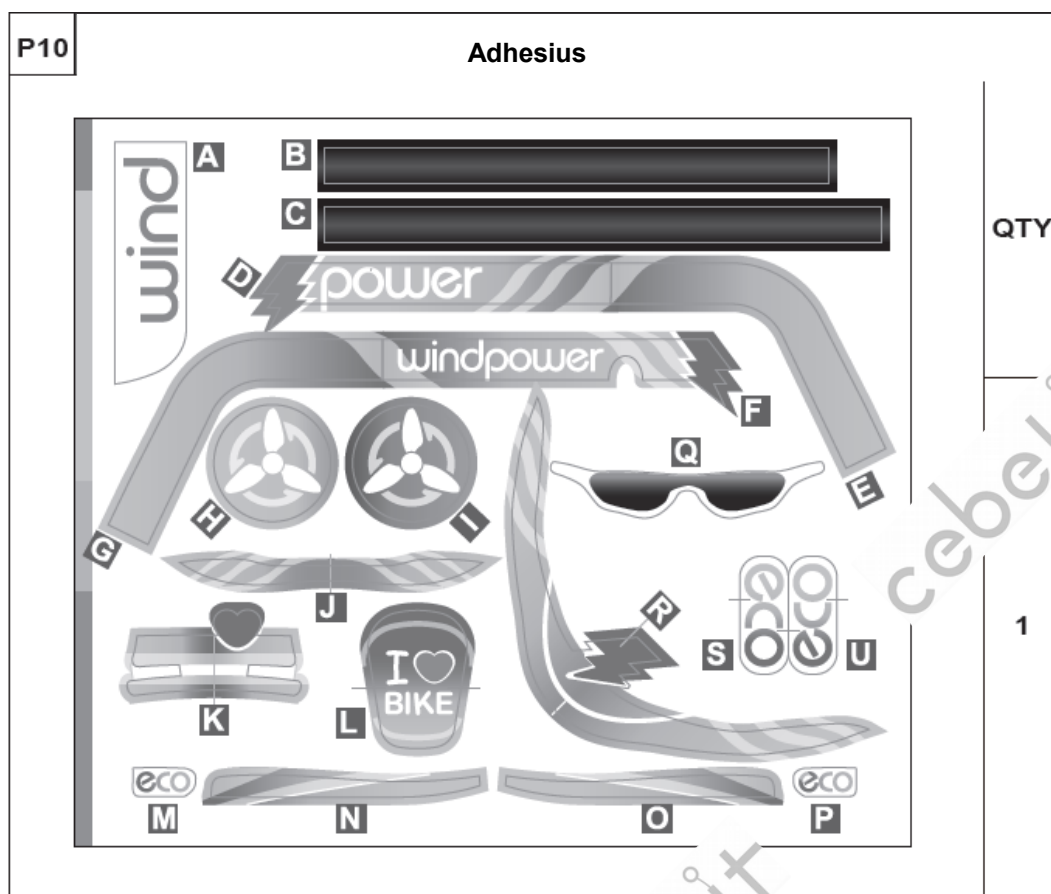

Tornavís

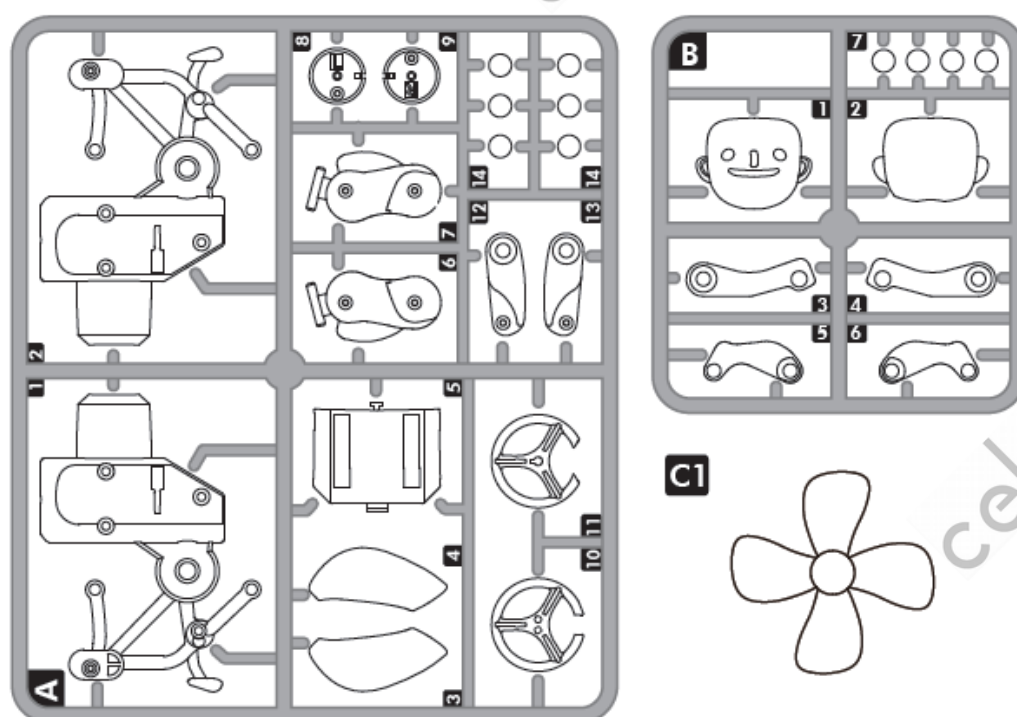

Alicates

Llista de peces necessàries

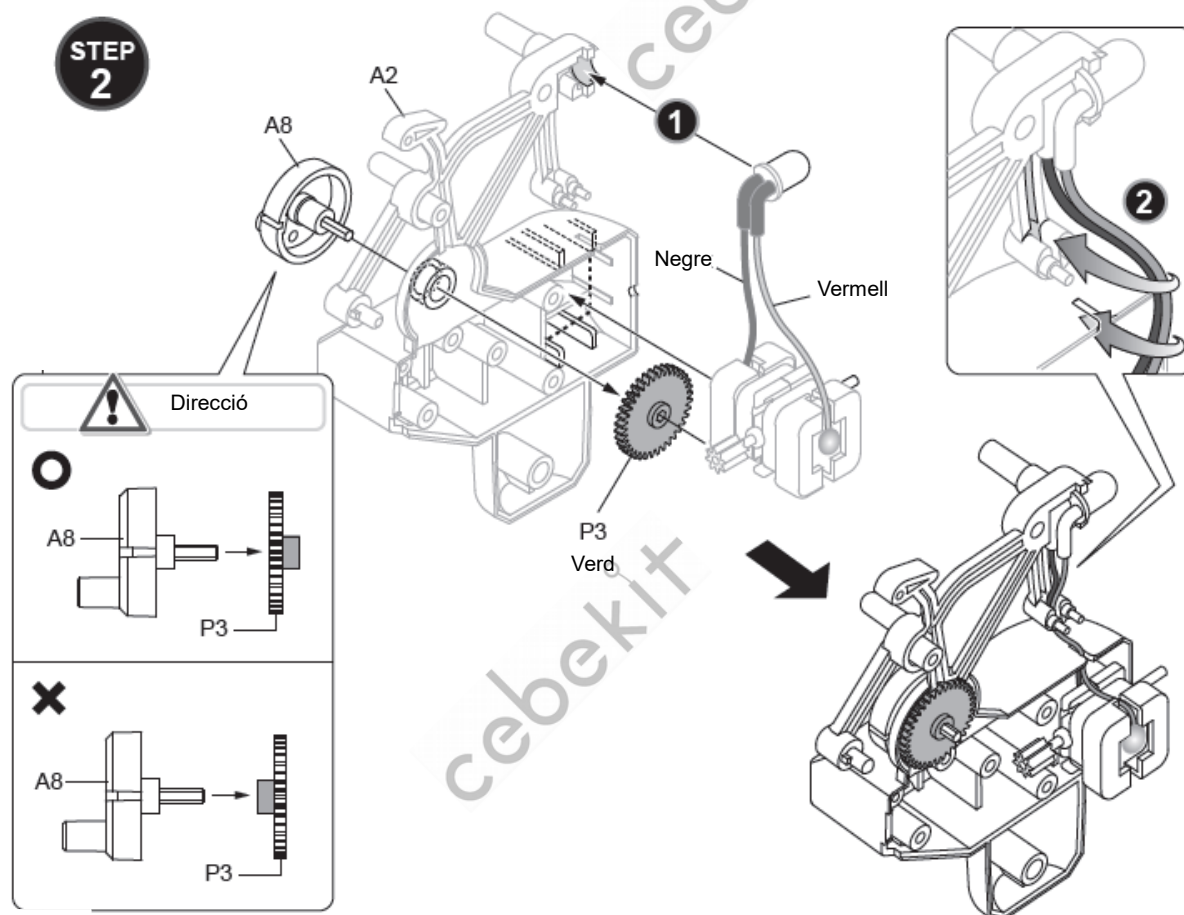

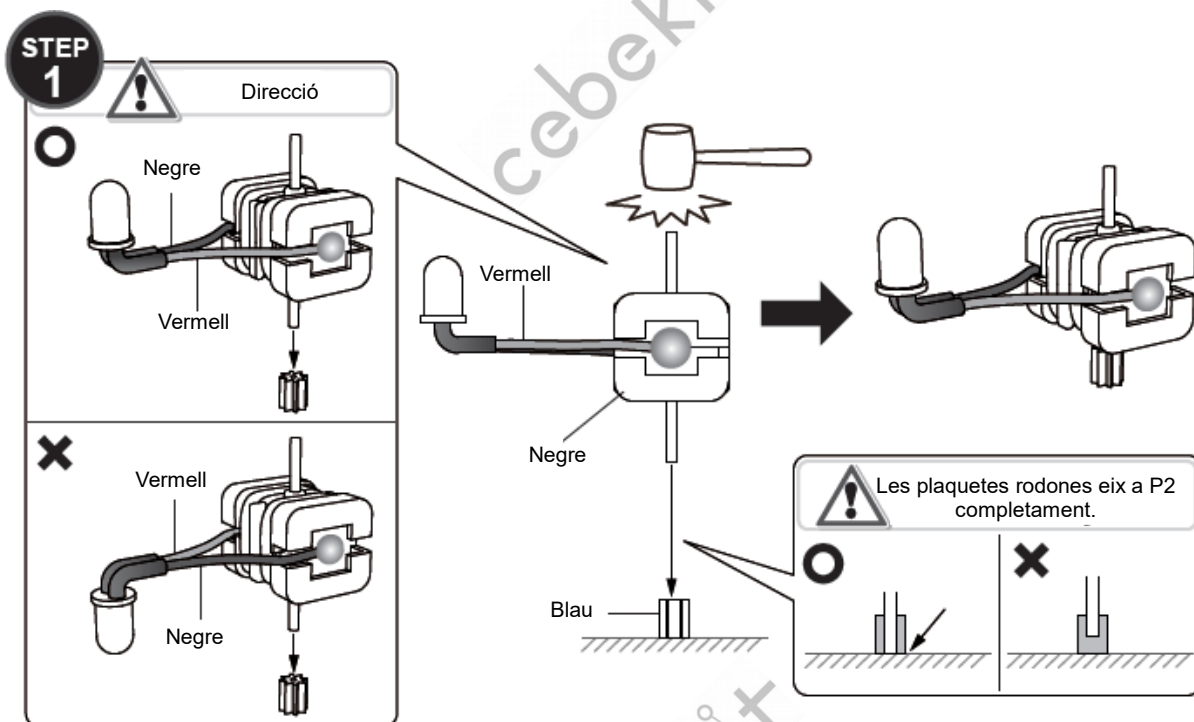

P1 Generador amb LED QTY 1	P2 Engranatge (Blau) QTY 1	P3 Engranatge (Verd) QTY 1
