

# REPELLERS & Electrical Fences

# Repellers

## Personal Anti-mosquitoes

**FAD-101** Electronic mosquito repellent emits a sound that mimics the movements of the wings of a male mosquito ready to mate. Female mosquitoes are those that sting during the gestation period to feed. The sound disturbs them and after a while they will completely avoid the protected area. No chemicals, no poison, no smell..

## Anti-plague Repeller

**FAD-200** Electronic anti-plague repeller supplied at 230VAC. Valid for mosquitoes, flies, cockroaches, insects, rats, and other insects. It does not affect dogs, cats and domestic birds. Reach: 100 meters. Power: 230VAC.

## Moles Repeller

**FAD-300** It works with battery **(not included)** . Plastic material. It sticks in the garden or orchard. Reach: 1000 m.

It also drives away mice, shrews, snakes and voles.

## Anti-mosquitos for Insides

**FAD-102** Science shows that female mosquitoes bite humans or animals to be able to lay eggs. At this moment they hate to meet male mosquitoes. According to this principle, the product is designed to drive the female mosquito imitating the sound of male mosquitoes. It can mimic the vibration sound of the dragonfly wing to mimical kinds of mosquitoes.

## Anti-plagues 3.0 Repeller with flash

**FAD-201** New microelectronic technology It works intermittently and produces, alternatively, high and low frequencies of ultrasound. Valid for: rats, mice, mosquitoes, ants, cockroaches, spiders, etc. It has 2 options: CF mode in 8 different frequency stages (19kHz - 100 kHz) and CV mode with variable frequency. Flash light incorporated that works for 60 seconds, at 5 minutes intervals. Very effective with mice. It is recommended to start in CF mode for a week, and then switch to CV mode, at a preventative level.

Reach: 100 m<sup>2</sup>.  
Consumption: 5w  
Power Supply: 110 V- 220VCA 50/60Hz  
DC5V- 1 A.

## Solar Snakes repeller

**FAD-301** It includes a solar panel on top. Plastic material for outdoors. It sticks in the garden or orchard. Reach: 700 m.

It also drives away mice, voles, moles and shrews.

# Electrical Fences

**FAD-31** Electrical insects Killer.  
It is an electrical system that electrocutes all insects.  
Practical, efficient, hygienic and automatic.  
It generates ultraviolet light that causes all kinds of insects to approach during the day and night.  
Low energy consumption.  
It works at 230 Vac

**FAD-712C** Solar anti-mosquito repeller.  
It eliminates mosquitoes by electric discharge using the ultraviolet light that attracts them.  
It has two light and power environments. White for ambient and purple lighting to absorb the luminosity in hours of sleep and increases activity against mosquitoes.  
It is supplied by solar energy during the day.  
Solar panel included.  
Easy to install and very effective.

**FAD-718** Rigid insulating poster, height 1,05m.  
Pack 15 units.

**FAD-719N** Rigid insulating poster, height 1,56m.  
Pack 15 units

**FAD-720** 250m conductor wire  
Ideal for fencing sheep, goats, cows, pigs and bulls.

**FAD-721** Conductive belt for horses 200 m.  
Specially recommended for horse fences.

**FAD-722** Electric shepherd from 9 to 12Vdc.  
It can be powered by battery or solar panels (20w).  
Reach from 600 meters, up to a maximum of 4km, perimeter.  
Ideal for enclosures of sheep, goats, cows, pigs, bulls and horses.

**FAD-723** Electric shepherd supplied at 230 Vac. It can be powered by battery or solar panels (20w).  
Reach from 600 meters, up to a maximum of 4km of perimeter.  
Ideal for enclosures of sheep, goats, cows, pigs, bulls and horse
