OZONE GENERATORS

High-tech ozone generators, which generates pure OZONE (O3), when connected to a high-voltage power supply.

Ozone is an activated oxygen, which due to its oxidizing power is bactericidal (eliminates bacteria), germinicidal (eliminates germs), mites (it is an anti-mite), and also viruses.

It also eliminates bad odors, from pets (dog, cat), tobacco.

It has the property of sterilizing the air, enriching it with oxygen.

Ecological and non-polluting method of disinfecting water, without using chemical products.

They can use the CEBEK cyclic timer ref. I-111 with separately adjustable times.

C-6885T Generates 200 mg / hour - coverage 120 m² - Transformer included - Connection to 230VAC

C-6886T Generates 500 mg / hour - coverage 300 m² - Transformer included - Connection to 230VAC

C-6007 Mini A400 air pump.
For small ozone generators of 200 and 500 mg.
Reference C-6885T and C-6886T

C-6887T Generates 1 gr / hour - coverage 500 m² - Transformer included - Connection to 230VAC

C-6888T Generates 2 gr / hour - coverage 1000 m² - Transformer included - Connection to 230VAC

C-6889T Generates 5 gr / hour - coverage 2500 m² - Transformer included - Connection to 230VAC

C-6890T Generates 10 gr / hour - 5000 m² coverage - Transformer included - Connection to 230VAC

C-6891T Generates 20 gr / hour – 10.000 m² coverage - Transformer included - Connection to 230VAC

Cyclical timer. 230VDC supply. CEBEK ref. I-111
